Sparkler Mitts

Stylish with an interesting construction - these crochet fingerless gloves are worked flat and use short rows to form a circle around the thumb. Because of this unusual construction, they are great to show off variegated yarn. These mitts are the crochet version of my knitted Starburst mitts.

Since I had some problems to find a name I asked the community of [knittingparadise.com](#) to help me come up with a name - thank you all for your great ideas. I finally settled for Sparkler - to go with the name of the knitted version of these mitts :)

Materials

- 3mm crochet hook
- about 40 to 45 grams of fingering weight yarn
- 4 removable stitch markers
- a tapestry needle to weave in ends

Techniques and Abbreviations

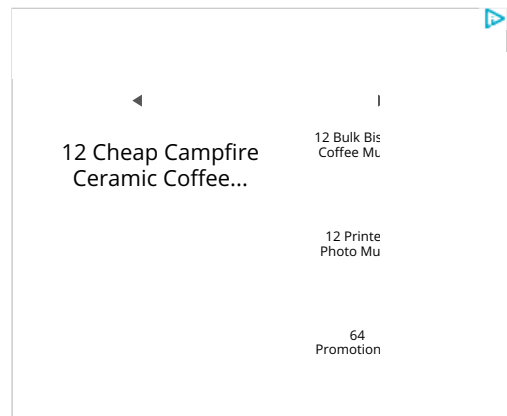

- **tc:** turning-chain
- **sctbl:** single crochet through back loop: <http://crochet.about.com/od/crochetterms/tp/back-loops-only-or-blo.htm>
- **dec or sctog:** dec or sctog: decrease by working 2 single crochet stitches together (in case of this pattern **all dec sts are crocheted through the back loop** of the 2 underlying stitches: <http://www.dummies.com/how-to/content/how-to-decrease-single-crochet.html>)
- **inc:** increase by working 2 single crochet stitches into 1 sc below (in case of this pattern **all increases are stitched through the back loop** of the stitch below): <http://www.dummies.com/how-to/content/how-to-increase-with-single-crochet.html>
- **ridge:** in this pattern I use the term "ridge" to describe two rows of sctbl stitches.
- **crochet short rows** (as done in this pattern (*)): work sc's (or sctbl's) up to the stitch indicated, then turn work (without a turning-chain) and start into the 2nd sc; when you're working over this turn in a following row, always crochet into the turning-sc as well. See pictures below. (*) there may be different methods out there, feel free to try them.

© <http://knitting-and-so-on.blogspot.com>

Short Rows

- **connect and turn with slip stitch:** join the last stitch of one row to the edge of another side: insert your hook into the last stitch of the row AND into the stitch of the part you want to connect with (called here: the other side) - see picture 1 below. Yarn over and draw yarn through two loops (picture 2 below). Then complete the sc. Do a slip stitch into the next row on the other side before starting the next row (picture 3 below).

Connect and Turn with Slip Stitch

- **join with single crochet:** as shown in [this YouTube video](#) by [tlcinspirations](#) - however, in this pattern it's not used to join one side to the other, but to join the last row to the very first row.

General Construction

The mitts are worked flat in eight sections (from A to H). The diagram shows how the sections form the complete mitt, how many stitches there in a full row.

It also shows the mitt is to be folded and which parts are to be attached to which when finishing the mitts (or while you're knitting section F and G). Sections E, F, G, and H are mirror images of sections D, C, B, and A respectively, i.e. where there is an increase in A, there is a decrease in H - and the short row lengths are mirrored as well.

Size and Gauge

This finished mitts measure 19cm in height - at their highest point. and about 19cm in circumference at the wrist.

11 rows of the used stitch (sctbl) equal 5 cm in height. And 12 stitches (sctbl) equal 5 cm in width.

Instructions

Section A

Chain 34 + 1 turning-chain

Ridge 1 : sctbl to end, tc; turn, sctbl all while placing to of the markers, M1 in the 9th stitch and M2 in the 12th stitch, tc

I'm in love with this design, but when it comes to connect section F which C I don't understand because the photo is not clear for me , Have you another photo to see? Sorry for my english I speak spanish. Thank you !!

SR 31. August 2016 um 17:59

When you start connecting the sides (C to F) you fold half of the mitt over and attach the last stitch of one row to the last stitch of the part crocheted before.

Alternatively, you can just crochet the complete piece and then sew the side together.

Hello,

a very nice design. I tried to crochet them. Absolut nice. I want to do a link to your pattern in my blog if I post my ones. Is it ok? And perhaps I make a german translation in my Blog, when I can.

Sorry my English is not so good, I hope you understand me.

Hallo Heike, danke für den Link von deinem Blog. Ich freue mich immer, wenn man zu mir verlinkt :)

Und über Übersetzungen freue ich mich auch: da die Anleitung unter einer „Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License“ veröffentlicht ist, darfst du sie gerne übersetzen und - unter den gleichen Bedingungen wie die Originalanleitung - weitergeben - d.h. für nicht-kommerzielle Weiternutzung ist sie freigegeben.

Noch toller wäre es allerdings, wenn die Anleitung dann auch auf deutsch irgendwo veröffentlicht würde und ich darauf verlinken könnte (wenn sich schon jemand die Mühe gemacht hat) - natürlich mit „Credits“, wer übersetzt hat ...

Liebe Grüße
